Automatic self-cleaning filter (VC1310L, VC2510L, VC3210L) obtained by Triple filter structure composed of : Powder filter + Damper + Prefilter

When the power is switched on, Prefilter collapses into itself to compress Damper, and fits closely over Damper and Powder filter.

When the power is switched off, Damper expands back to its original size and shakes off dust from Prefilter automatically with its expanding power.

WUT02
WIRELESS UNIT ADAPTOR SET
